**PRESS RELEASE**  
**For Immediate Release**

**US Corps of Engineers Selects the HRT™ Rings for Iraq Deployment.**

Woodburn, OR. - April 15, 2004, US Corps of Engineers in conjunction with a private contractor awarded the contract to Tactical Precision Systems for supplying their HRT™ - 7075-T651 Aluminum Alloy scope rings for use in Northern Iraq.

The HRT™ scope rings, made from High-Strength & Lightweight 7075-T651 aluminum alloy was designed to withstand the adverse and severe conditions of the battlefield. With the Mil-Std Type III black hard anodizing, it provides the ultimate protection from damage and corrosion when failure is not an option.

The HRT™ Scope Rings are available in 1", 30mm and 34mm with a wide range of heights to accommodate most any application. The precision and uncompromising quality of the TPS scope ring line is second to none, along with the other mission critical products offered.

The HRT™ Scope Rings are currently in use by several operators within the U.S. Military and Local Law Enforcement agency's as well as other military units around the world.

The suggested retail price for the HRT™ Scope Rings is \$62.95

Since its inception in 2002, Tactical Precision Systems, Inc. has remained steadfast on its goal, "Build the Best for Less". The ultimate goal of Tactical Precision Systems is to provide uncompromising quality in our products for our men and women of the U.S. Military as well as for the sporting enthusiasts who demand the best from their equipment.
